

I am writing in regards to the FCC proposal to expand LPFM stations to take priority over current FM translator services. I am currently a listener to such an FM translator, K-Love, and believe that this type of station is a valuable part to the local area. K-Love provides clean air broadcasting, helping to instill family values with life enriching music and programming across the country, to include my listening area/community. Without the ability to use FM translators, this listener supported station would not be able to broadcast here. If this station were lost, there would not be the availability to have such a family-oriented, listener friendly/enriching station. My community will be losing a valuable asset with the loss of stations like K-Love. It is in the public interest of the area where I live to keep K-Love running. My life has personally been helped by the programming of K-Love. Please help support stations like K-Love which is here to enrich our lives and community by not allowing LPFM stations to have priority over the current FM translator services. Thank you for your interest in my comments on this important issue.
